■ Monitor refresh frequency : 60Hz			

NOTES

- Please visit our website to update the latest driver version for the good performance.
- Unplug the USB 3.0 DISPLAY ADAPTER before executing the Setup or un-installation programs.
- We suggest USB 2.0 for 'Office Application' only. Video playback is not recommended due to USB 2.0 bandwidth limitation causing imperfect video performance.

- Do not recommend to connect USB 3.0 DISPLAY ADAPTER via the external USB Hub.
- System reboot is required for the driver installation.
- Connect the external display device (monitor/projector) to the VGA/DVI/HDMI connector of USB 3.0 DISPLAY ADAPTER before connecting to USB port of your Mac.
- Support multi-display up to three adapters for office application.
- Support one display on macOS: 10.13.x.

DEVICE DRIVER INSTALLATION

Installing the device driver enables your computer's operating system to recognize the **USB 3.0 DISPLAY ADAPTER** once it's connected. Please check your operating system and refer to the appropriate installation procedure to begin installing the device driver.

This section illustrates the simple device driver installation procedure for computer running **macOS Mojave** (10.14.6). Please make sure the USB 3.0 DISPLAY ADAPTER is **unplugged** from your MacBook or Mac Desktop before executing the setup program.

Step 1

Insert the Driver/Manual CD into CD-ROM drive or download the Mac driver from the website, then save this Mac driver: "xx.x-xxxx.dmg" to the desktop of your Mac.

You may click on the link below (the support page at www.mct.com.tw) to download the latest Mac driver to Downloads folder, save the Mac driver: "xxx-xxx.dmg" to your Desktop.

<https://www.mct.com.tw/include/download.php?dl=MjAxODAwNzczX158ZG93bmVYWRRefDAwMDAwMDAwOTM=>

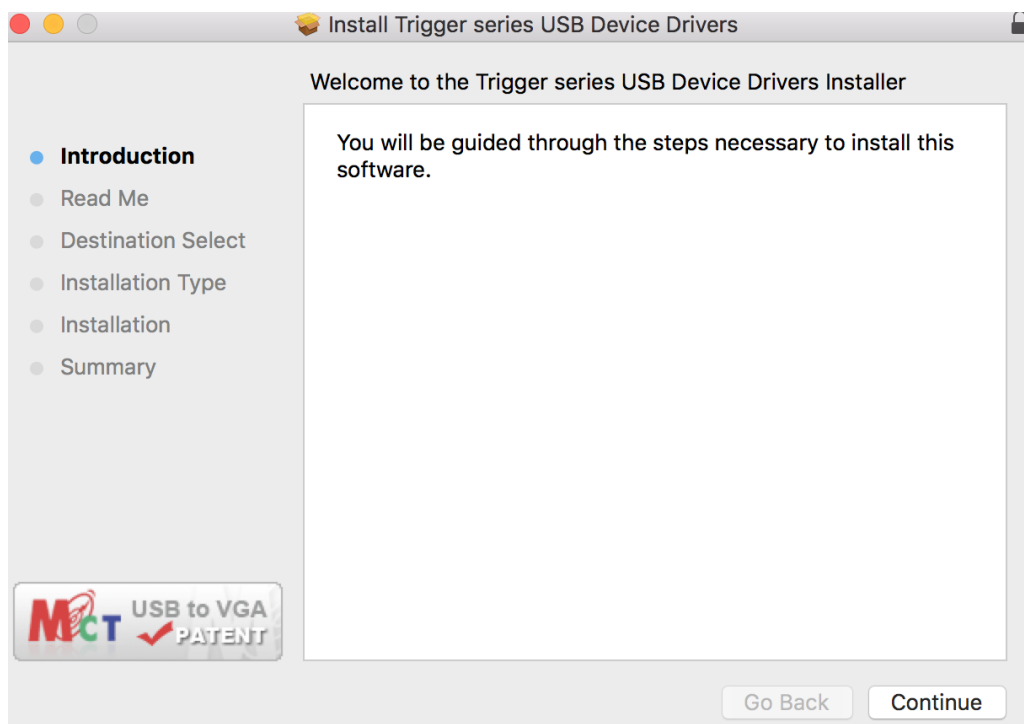

Step 2

Run the .dmg file to load drivers to the mac folder. Double click "xx.x-xxxx.dmg" to load the drive, then click "MCT_Trigger_xxxx.pkg" to install the Mac driver on your Mac.

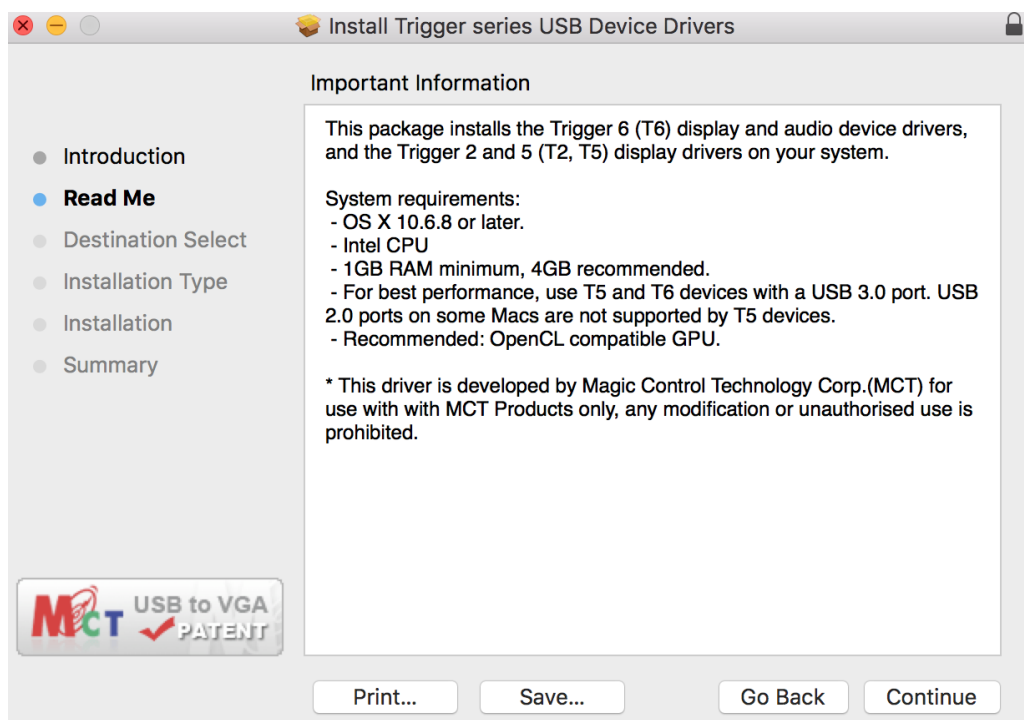

Step 3

Click “Continue” to proceed.

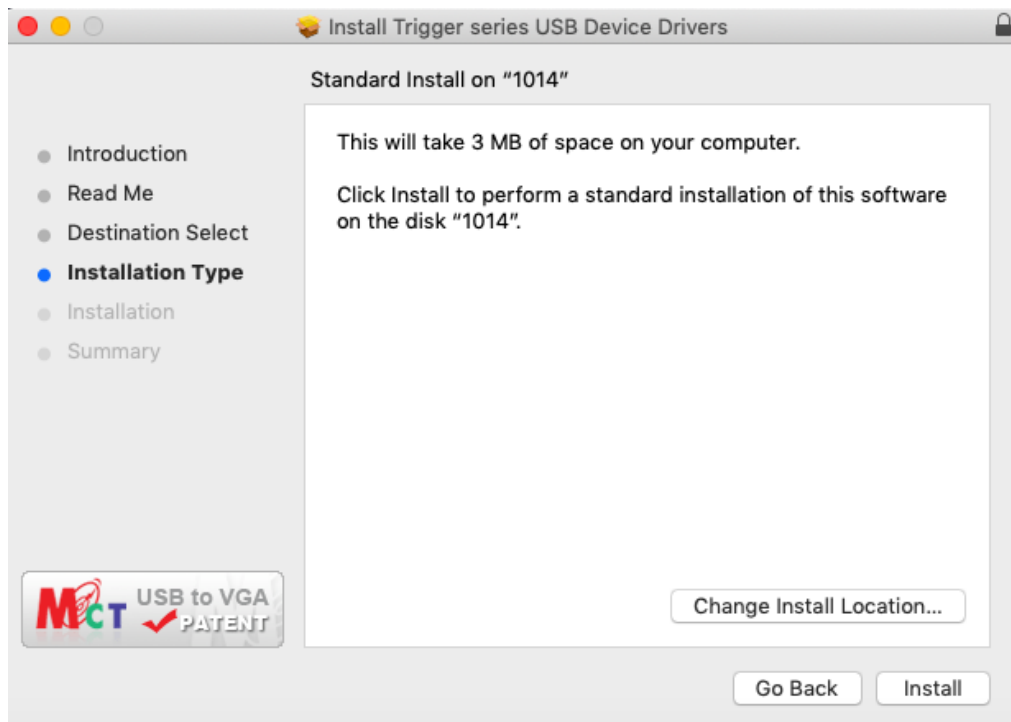

Step 4

Click “Continue” to proceed.

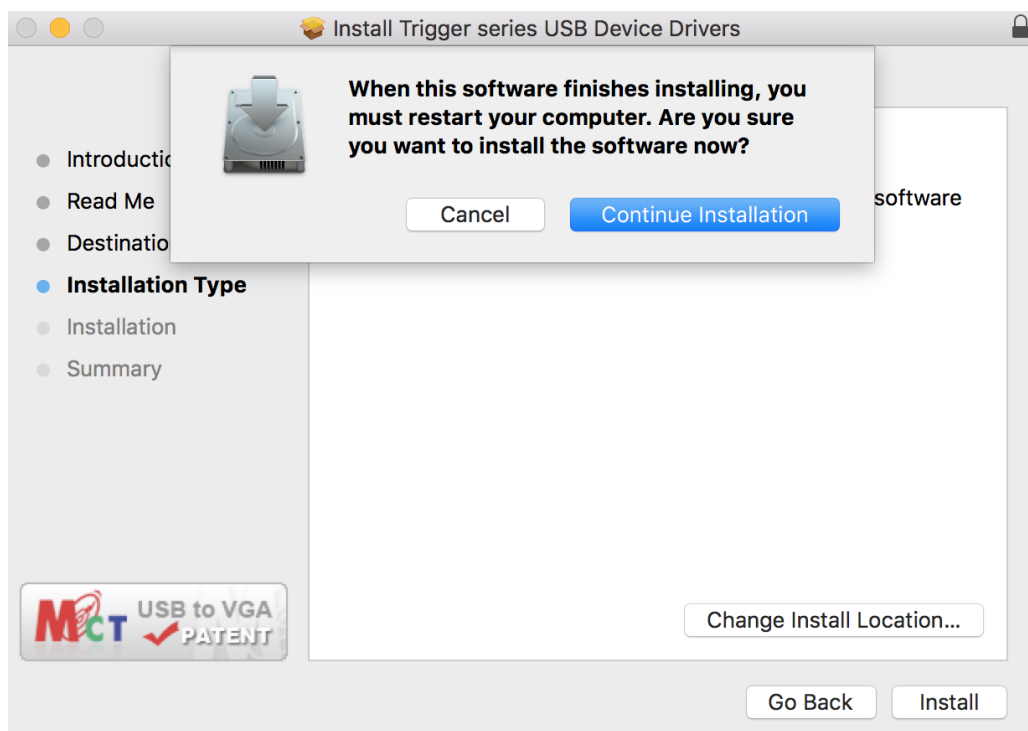

Step 5

Click **“Install”** to proceed.

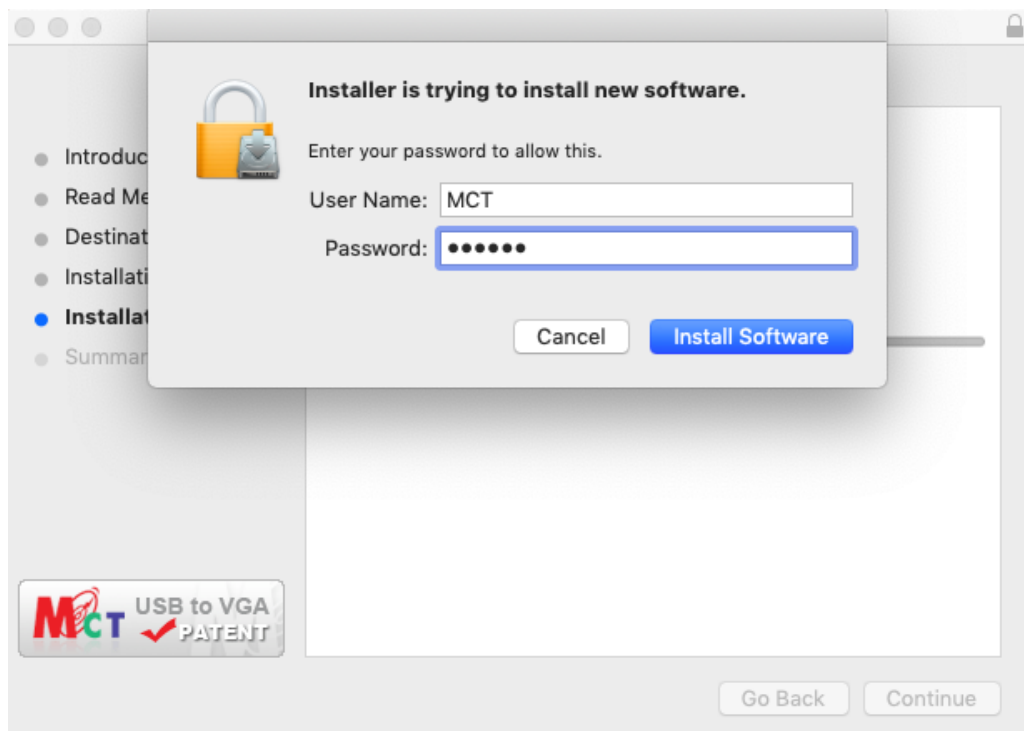

Step 6

Click **“Continue Installation”**

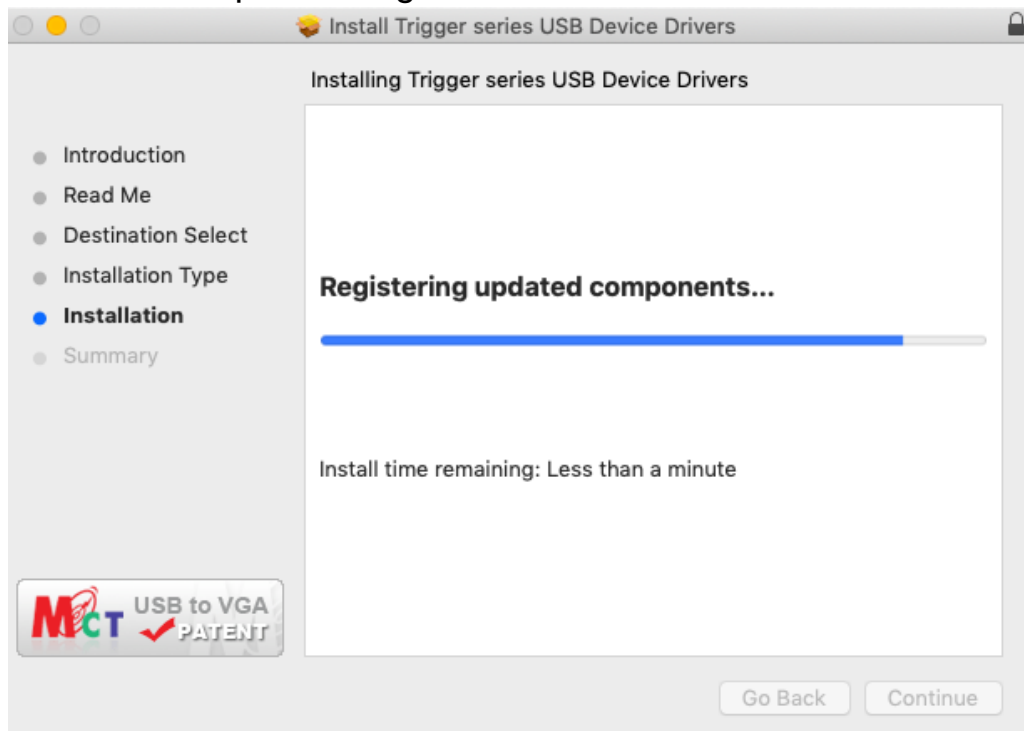

Step 7

Type in your password and click “**Install Software**”.

Step 8

Installation is processing...This will take a few minutes.

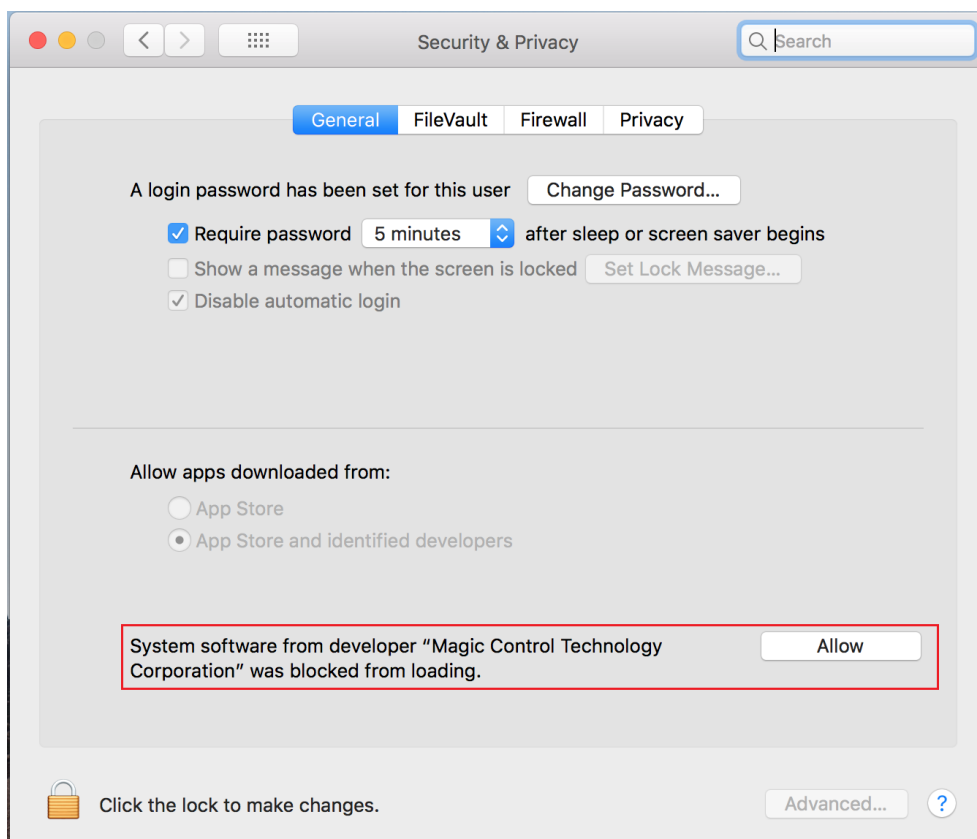

Step 9

The system should pop-up a screen “System Extension Blocked” after installation asks the user to enable these extensions for the first time. Click “**Open Security Preference**” to go setting.

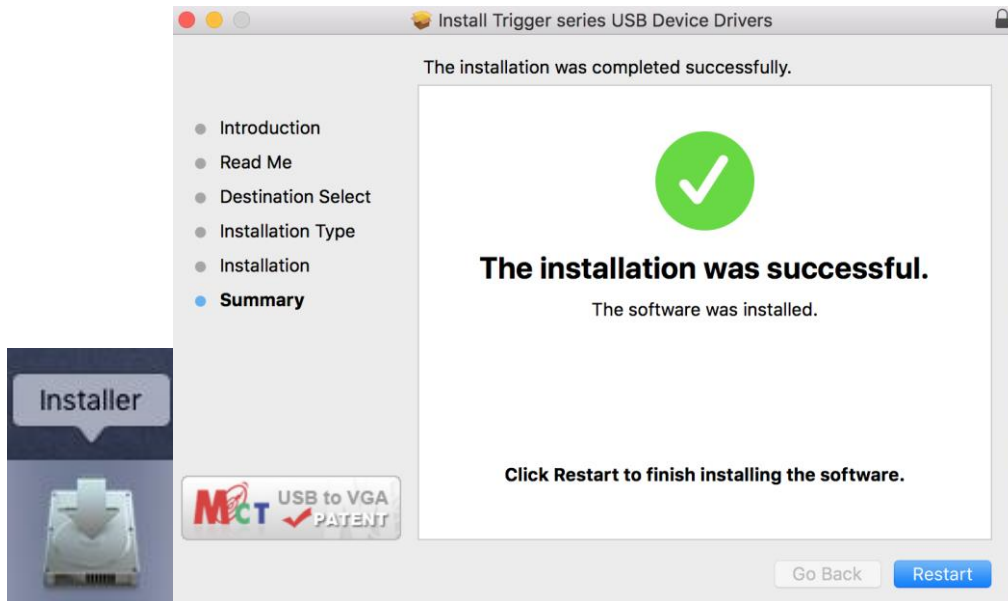

※ **Important: This warning is not always shown. Even if it is not shown, for new installations the user must “Allow” to install the MCT Trigger driver.**

Step 10

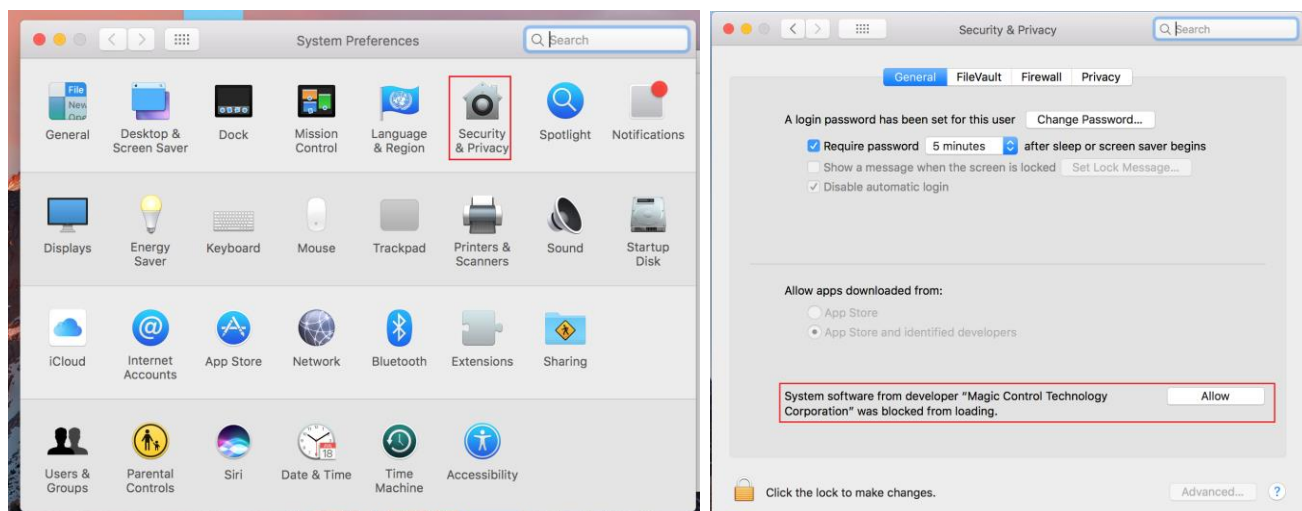

Click “**Installer**” to display the installer window, then click “**Restart**” to complete the driver installation.

Step 11 (After System Reboot)

1. Connect the external display device (monitor/projector) to the VGA/DVI/HDMI connector of **USB 3.0 Display Adapter** and turn on the display device
2. Plug the **USB 3.0 Display Adapter** into the USB port of your MacBook or Mac desktop. You may begin to use the USB 3.0 Display Adapter with your display device now.

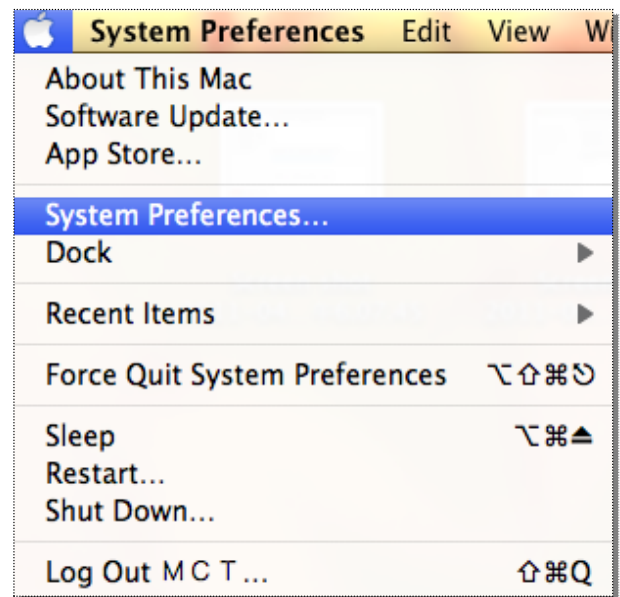

※ If the extended display is not worked after system reboot. Please go to “**System Preferences**”→“**Security & Privacy**” to make sure you have allowed “App Store and identified developers”.

FUNCTION INSTRUCTION

DISPLAY ARRANGEMENT

Go to , and then select “**System Preferences...**”

On “**System Preferences**” click on the “**Display**” tab. It will pop up this screen

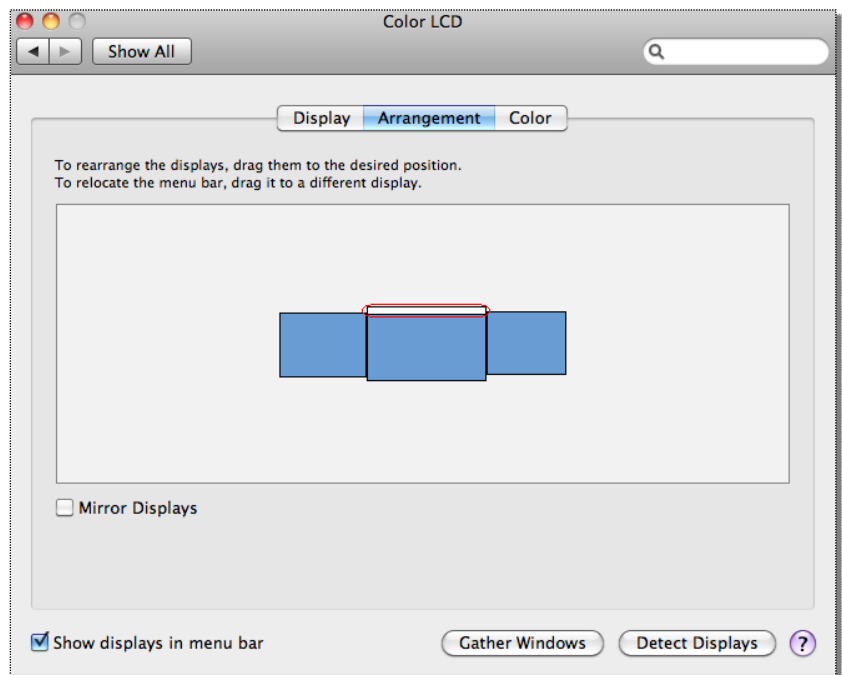

On the “**Display**” screen, you can adjust the resolution, display mode and color range.

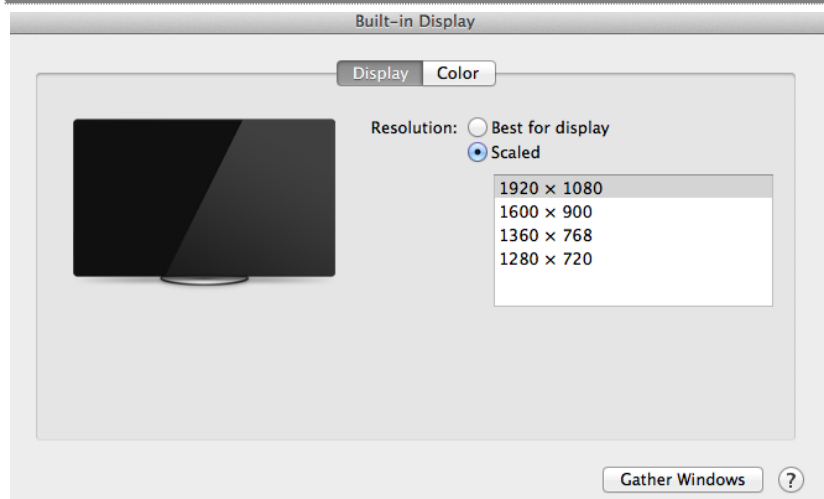

Click on the “**Arrangement**” tab, uncheck “Mirror Displays” to extend the screen.

Move the bar to assign any display to Primary and the display location.

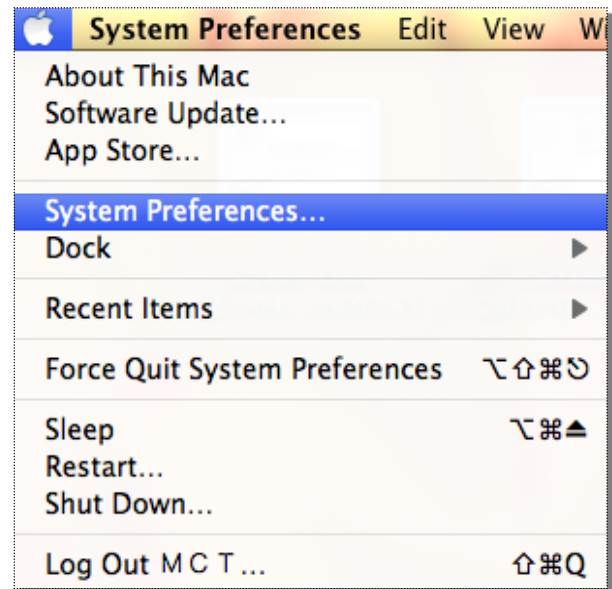

✧ Adjust your secondary monitor resolution, click on the “**Scaled**” button.

SETUP THE SOUND (USB 3.0 TO HDMI)

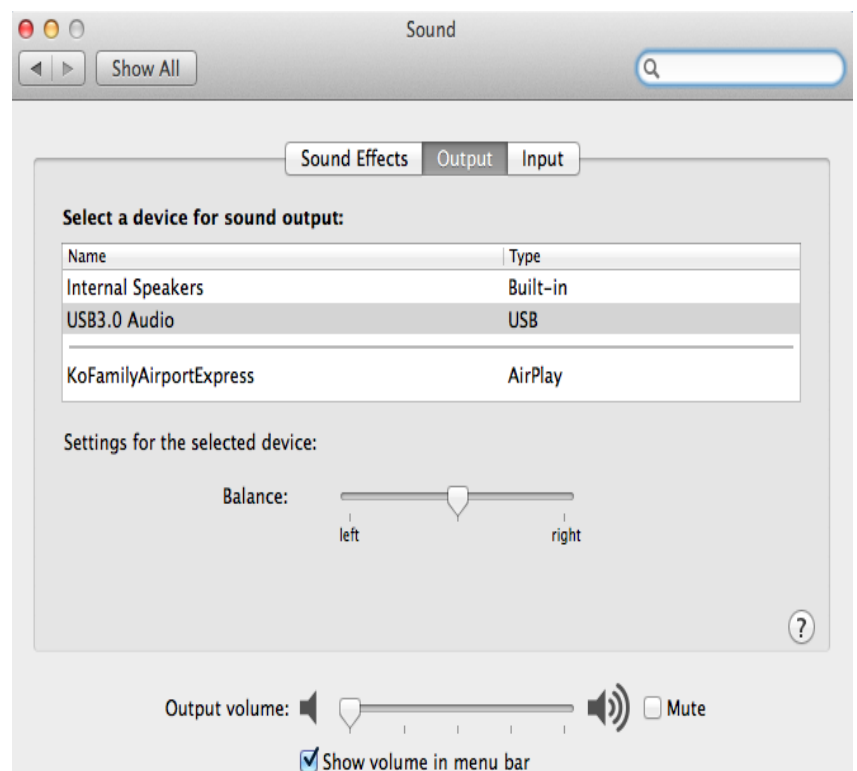

1. Go to , and then select “**System Preferences...**”

2. Go to the “**System Preference**”, and select “**Sound**”

3. The sound “Output” options are shown below. You can select a device for sound output by clicking it.

DEVICE DRIVER UN-INSTALLATION

Step 1

Unplug the **USB 3.0 Display Adapter** from the USB port

Step 2

Double click “xx.x-xxxx.dmg” to load the drive, and click “Uninstall.command” to un-install the driver

Step 3

Key-in your password to proceed with the driver’s uninstallation.

※Please reboot the system to uninstall the driver completely.
